

# Teradata Professional Services

---

Our *Teradata*\* expertise stretches back to the late 1980's, before the phrase 'data warehousing' was even in common use, and almost as far back as the first commercial use of *Teradata*. In fact, one of our sales consultants sold several of the very first *Teradata* platforms deployed in the UK.

“ We boast 3 Certified Teradata Masters ”

We are the **only** specialist Professional Services company in the UK that offers this level of *Teradata* expertise. From application specific data marts, to multi-billion row, multi-terabyte, enterprise-wide data warehouses, we can honestly say we've been there, seen it and done it all before.

In addition to our significant expertise, we insist that each of our consultants is validated through the *Teradata Certified Professional Program*. To demonstrate our commitment to the program, **Leading Edge** boasts 3 Certified Teradata Masters. The combination of expertise and vendor certification guarantees the unrivalled quality of our *Teradata Professional Services*.

Whether you require high-level strategic consulting, hands-on application development, application support, database administration or training – **Leading Edge** can help.

Your *Teradata* system represents a considerable business investment. We will ensure you maximise the return on this investment through a tailored Professional Services offering to ensure you meet your business goals.

# Teradata Professional Services

---
